

ASC Evaluation / Judging Awards

The Association is always looking to drive up standards of evaluation as this is arguably the most powerful way that people develop as speakers. By being evaluated in a friendly, supportive, and constructive way and by offering evaluations of other speakers, we can gain a deeper insight into the various strands of communication excellence.

High quality judging is crucial for ensuring that our competitions remain as fair and equitable as possible and these awards celebrate and enhance speakers as they become better evaluators and judges. The National Education Director and National Development Officer look forward to rewarding your efforts and sharing your learning with the membership.
